

## **About No Humanity**

This is a website which initially represents the interests of author and his wife, and all the family who are affected by the issues covered.

The author has a long history of campaigning on environmental and animal / human rights issues. The author, in his 20 years experience of fighting for right and might, has personally experienced wide-spread betrayal, corruption, favouritism and deceit inside the establishment. This level of behaviour has been seen in Government high office right through to the industries and outside influences that effectively control, manipulate and dictate UK laws.

Due to the author's serious health problems, escalating from 1994 onwards, it has been increasingly difficult to pursue the aforementioned campaigns. By 2006, the author was compelled to seek respite and much-needed 'recuperative therapy' overseas. This simply meant taking a break from life.

The author's brother was 6 years older. He died in 2007 after succumbing to stress and suffered heart failure. The author does not wish to become another victim of this condition, but already has heart problems.

20 years of campaigning, suffering from fighting against corrupt and vested interests has left the author debilitated and suffering from chronic fatigue - amongst other dangerous conditions. But this is not a plea for sympathy, it's just to inform the reader that even the most healthiest person has limits of endurance. The author's were passed a long time ago. Consequently, the ongoing distress caused to the author by those with malicious motives, and the added stress being caused by those in power, is worsening the author's condition from day-to-day.

The author's wife is also suffering from the enforced separation. She is being punished for no good reason. She too has had to endure many trials and tribulations in her life, and has had to make painful choices in her modern life because of it.

Being forced to leave her daughter behind in Indonesia has not been easy. But as part of her duty towards her daughter, she has been forced to travel overseas to earn enough money to ensure her daughter has a decent education. A single mother cannot do this working for a US company for \$1 a day in Indonesia. She can afford to do it working for a US company in the US for \$9 (around £4.50) an hour. Notably she also pays her dues in her new country - she pays tax and social security, and gets nothing back.

It is the fault of the West that it exploits slave labour in poor countries. As a consequence, some of the unfortunate souls who are driven to desperate measures, have to seek their livelihood elsewhere.

It is an immensely evil world when those who are driven by greed, and the desire for war and destruction, can spare no time for those who wish to be united in love.

This is the author and his precious wife. Victims to the mindset of those with no rooms in their hearts for compassion. We don't want any special favours, we just want justice and to be together.
