Date: 23rd February, 2008.

Dear Sir

I wrote to you on the 11th February telling you of my terrible predicament where I was victimised at the hands of corrupt immigration officials in San Francisco on the 30th January, 2008.

I told you of the crisis this has caused in my life, that your administration has left me destitute and left my wife in terror. I urged you, compassionately, to allow me immediate access to the USA to clear my affairs there and to be re-united with my wife so we could move onto another country.

You have done nothing but 'pass the buck'. The letter you sent me is totally worthless. After speaking to a senior port official in Seattle, and after speaking to an official in the office to which you forwarded my letter, I have drawn a blank.

Unless I get a Visa I have no chance of returning to the USA. You have the power to act let you willingly allow me and my wife to suffer. You have shown no mercy, no compassion, no love for the so-called freedoms your country claims to be fighting for. All the US administration seems to be interested in is making enemies and behaving like the proverbial 'playground bully'.

My one saving grace is that I know a lady in the USA. She has rallied around some friends to go and rescue my possessions so they can at least be put into storage for a short time. My wife will also be aided. This old lady broke her back some years ago, has serious heart trouble and lives from day-to-day. She is so severely crippled and yet she will do more for me in the matter of hours than you will condescend to do for me at any time.

And while this old lady, who may be making her last gesture in life, is helping me without question or reward, you sit back and do nothing but wash your hands of my problems. So much for an administration which just strolls into other countries at will, bombs, murders, mutilates and tortures people, and yet cannot find an ounce of compassion to help a heartbroken couple who just want to be re-united. This old lady is what America should represent, not what you represent.

You should hang your head in shame. Perhaps it is no surprise your country is often referred to as the 'Great Satan' when you behave like this. Your administration deserves such a title. What a pity all of the decent Americans I have met also have to carry this label because of your country's 'sickness'.

Perhaps Islamic-dominated Indonesia will treat me and my wife with more compassion and respect when my Indonesian wife and I (hopefully) arrive. They certainly can do little worse than you.

Signed,
